NOTE: Hinge is under constant spring tension. Keep fingers clear when operating.

NOTE: Table leaves are held securely under table. Rotate leaves up (180°) and hinges automatically lock leaves into horizontal position. Flap hinge is designed for relatively light duty applications. Flap should not exceed 8" in depth, please conduct your own test. Häfele cannot specify a weight rating.

COMPOSITE COUNTERWEIGHT

- Made of 100% recycled materials, these sheets are a sustainable, low-cost alternative to standard materials often used as counterweights, such as lead and steel. They are also the highest density product replacement to steel counterweights. With a low carbon footprint, these sheets can help you meet criteria for sustainability certifications, such as LEED and Envision, or comply with requirements of CPSC & the new STURDY act.
- Screws directly into back.

AXESS 1 INTERLOCK™

Undermount Soft Close Slides

The **Axess 1 Interlock** can also be used in cabinets with undermount drawer slides. The key to doing this is to maintain a space of 1/4" between the drawer box and the surface the lock is fastened to. This can be accomplished by attaching the drawer slide to a block extending into the drawer opening. (See Illustration "D") If you use 1/2" drawer stock block out 3/8", for 3/8" drawer stock block out 1/4", and for 3/8" drawer stock block out 3/8". Molding profiles are available from Keim Lumber for this purpose. KL 22660 is designed for 1/2" drawer stock, KL 22667 is for 9/16" and KL 22668 is for 5/8". The drawer box width stays the same size it would be if regular ball bearing slides were used.

The **Axess 1 Interlock** has been designed to be a simple and reliable safety feature. However, it's effectiveness depends upon it being installed correctly. If the space between the drawer box and the surface the lock is fastened to is greater than 1/4" the rod will not rotate far enough upon the opening of the first drawer to prevent another drawer from opening. It is the responsibility of the installer to test each drawer as specified in ASTM F2057-23 section 9.

The manufacturer does not assume any liability for damage or injuries due to the tipping of furniture containing this lock.

Cabinet Preparation

The **Axess 1 Interlock** is designed to work in your furniture as you've always built it. No wasted space behind drawers or extra difficulty building custom pieces because of the interlock's requirements. All that is needed is a 3/4" offset from the outside edge of the drawer opening out to the surface the lock is fastened to. If the outside vertical stile is 1 1/2" wide no extra blocking is needed, the lock will fasten directly to the inside of your piece. If the stile is 2" wide you'll need to block out 1/2" to maintain the 3/4" offset. See Illustration "C" on Back. This 3/4" offset is essential for the lock to function properly. All other measurements do not need to be precise.

The lock can also work for undermount soft close drawer slides, see instructions on back.

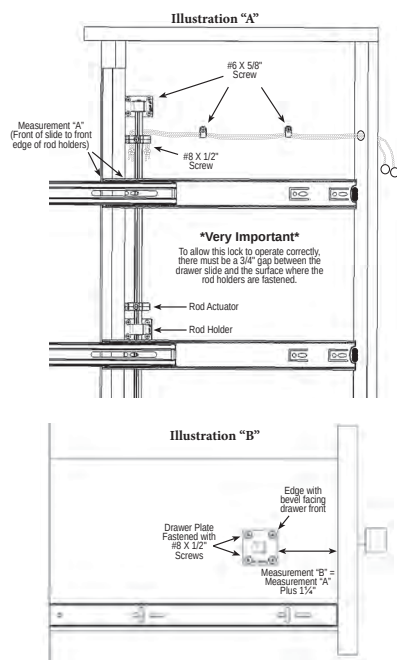

Installation Instructions

Fasten rod to left side of cabinet using #6 x 3/8" screws as shown in Illustration "A". If the lock must be on the right side of cabinet it needs to be installed upside down. To accomplish this, remove screws from ends of rod, trade the rod actuators at each end so the actuator with strings is at top, and reassemble. Space the rod holders evenly, the rod must be supported along its entire length to keep it from flexing instead of turning when a drawer is opened.

Using the #8 x 1/2" screws, fasten the rod actuators so they will be 1 1/4" above drawer slides.

Once cabinet members of drawer slides have been installed, measure from front of cabinet member to front edge of rod holders as shown in Illustration "A". This is measurement "A". Add 1 1/4" to this to get measurement "B" as shown in Illustration "B". This is the minimum distance from the back side of the drawer front to the front edge of the drawer plate. Leaving 1" space between drawer member of slide and bottom of drawer plate, fasten drawer plate to side of drawer using #8 x 1/2" screws.

Remove split rings from loops at ends of string. Fasten string holders to sides of cabinet as shown in Illustration "A". Drill a 1/4" hole through the back of cabinet. Run strings to outside of back making sure the string closest to front of cabinet goes between rod and cabinet side. Reattach split rings, install drawers, and test as specified in ASTM F2057-23 section 9.

SPECIFY IF YOU WANT LEFT OR RIGHT SIDE

For the safety of the children in your life, this piece has a drawer interlock that will only allow 1 drawer per vertical stack of drawers to be opened at a time. Always close first drawer completely before attempting to open a second drawer.

This interlock may also be used as a child access lock. There are 2 strings extending through the back. Pulling the colored string will lock all interlocked drawers and pulling the white string will allow 1 drawer at a time to be opened as before.

AXESS 1 INTERLOCK™ SYSTEM
Made in Ohio
See other side.

BECAUSE WE CARE

The **STURDY Act** is a Federal Law (16 CFR 1261) passed to reduce injuries and deaths of small children from furniture tip-over. To help comply with the **STURDY Act**, this piece has a drawer interlock installed. This limits the number of drawers that can be opened at one time, reducing the risk of tip-over while greatly reducing or eliminating the need for counterweight.

Be sure to read and follow ALL warning labels inside furniture.
