★ Sustainable Outdoor Living ★

A passion for fine furniture has been a part of the legacy of the founder of Okaw Amish Furniture for over thirty years, with manufacturing experience producing premium furniture for American homes. Okaw Amish is committed to designing, producing, and distributing comfortable, durable, and stylish outdoor furniture *from the finest recycled materials available.*

★ What is Poly Lumber? ★

Our products are made with high-density polyethylene – which is impermeable and doesn't bond to other materials; making our plastic lumber resistant to corrosive chemicals and graffiti. Plus, with its color safe technology, your product will shine for years to come.

High-Density Polyethylene (HDPE) plastic lumber is a strong and durable building material that can be customized for a wide variety of commercial, residential, and structural solutions. *Sourced from post-consumer and post-industrial sources, like milk jugs and laundry detergent bottles, our HDPE plastic lumber is a high-performing and environmentally-friendly material.*

Poly lumber materials excel in all the areas where wood fails in comparison. *Our products will never need to be painted, stained or sealed.* They are impervious to moisture and insects – so you'll never need to worry about structural damage from those issues.
